PROJECT WORK

- ***Road Accident Analysis** — Analyzed 188 accident casualties by vehicle type, road type, season, and time trends to identify high-risk patterns and recommend targeted road-safety measures.*
- ***Maji Ndogo Water Scarcity & Access Analysis** — Used Power BI to analyze water accessibility, queue times, locations, and demand patterns, identifying underserved communities and opportunities for improved water-resource allocation.*
- ***Crime Rate Analysis** — Analyzed crime patterns by province, victim gender, crime type, and time/day to identify high-risk periods and support targeted prevention strategies.*
- ***Maritime Tragedy & Passenger Survival Analysis** — Used Tableau to examine the relationship between passenger class, age, and survival outcomes, highlighting disparities in survival across passenger groups.*
- ***Revenue & Sales Analysis** — Analyzed product/category performance, customer segments, subscription status, and purchasing frequency to identify revenue drivers and opportunities for customer retention and inventory improvement.*
